WHY THIS INVOICE

"please go ahead with 250 fintech CFO leads in Manchester"

P1 P2 P5 P6 P3 P4

Why we billed this.

Each line traces back to the client's own words, what we remember agreeing, and the policy that allowed it.

CLIENT SAID	“please go ahead with 250 fintech CFO leads in Manchester”
WE REMEMBERED	**2026-08-12: Agreed 10% off orders over 200 leads**
CALCULATION	`250 × £4.00 = £1,000.00` `− £100.00 agreed discount = £900.00`
POLICY	P1 Bill only from a client message with an explicit commitment. P2 Prices come only from the rate card. P5 Known clients only. P6 One invoice per commitment message. P3 Discounts need a remembered agreement, capped at 15%. P4 Auto-send up to £1,000. Above that, one account-owner approval.

The language model only read the message and wrote this explanation. The price, the discount, the approval and the Stripe call were made by code, and each step is in the audit ledger under 465a5129-e931-4f02-824d-979045418857.
